/	Chapter 1: Modules, Comments 2 pip
	The Alberta Mark Aller Alberta Committee and the Market and the Ma
	Lets write our very first by thon program. Create a file called hello-by and paste the below code in it
	Create of file colled hello the and baste the
1	below and in it
	WWW WWW III
	print ("Hello World") -> print is a function (More later)
	The to have a live a first Attack things
	Execute this file (by file) by typing bython hello by and you will see Hello World printed on the Screen.
	and you will see Hello World printed on the
inali)	Screen.
71	in this rather
	Modules
	A module is a file containing code written by somebody else (usually) which can be imported and used in our programs
	by somebody else (usually) which can be
	imported and used in our programs
LAL	Then had a second of the secon
	Pip
	Pib is the backage manager for buthon
	Pip is the package manager for python You can use pip to install a module
	on your system
	pip install flask installs
	flask module.
	Types of modules
	Types of modules
1-	There are two types of modules in Python Built in modules -> Pre installed in python External modules -> Need to install using pip.
17	There I made the little of the little of the later of the
22	FAITURION MEET TO Install using pip.
12.	Same examples at hill is as I be as
	Some examples of built in modules are tensorfow, flork ek.
	some columptes of caternal modules are tensorfow, flask e.k.
